

A map of EnergyConnect.

SecureEnergy led by Elecnor Australia, has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply and is expected to be completed by 2025.

2. How do I apply?

Frequently Asked Questions

1. What is the Legacy 100 Program?

The Legacy 100 Program is the nation's first multi-million-dollar training initiative that aims to boost the skills in the power transmission sector by offering an opportunity to 100 candidates to complete qualifications in Transmission Line Construction as part of the EnergyConnect project.

SecureEnergy and Transgrid have launched this training initiative to boost skills in the power transmission sector across regional NSW.

Legacy 100 is a unique pilot training program developed for the industry.

Riggers work at a tower at Buronga.

3. Are there any special requirements?

> This program ideally suits someone who is fit, enjoys working at heights, willing to learn and prepared to live away from home for 21 days at a time in a worker accommodation camp in Regional NSW.

> All applicants require a white card and be capable and competent to work at heights. The towers under construction range in height from 55 to 65 metres tall.

> Applicants need to be a minimum of 18 years of age at the time of commencing the program as Safework NSW has minimum age limits on some high risk work licences.

> Completing a pre-employment medical with alcohol and drug testing is mandatory. Alcohol and random drug testing will be part of the daily routine.

4. How long will the training take to complete and what is involved?

The training is scheduled to take six months (dependent on previous experience, this timeframe may be shorter or longer). During this time, you will study various units to complete the Certificate II in Transmission Line Construction (UET20422).

The program will consist of classroom, online and on the job training to help participants achieve their Certificate II in Transmission Line Construction. Legacy 100 will form the backbone of the future workforce in the transmission tower construction industry, with workers to use the skills gained on EnergyConnect to build other future transmission line projects.

Participants will learn a wide range of skills from earning their high risk licences to performing rigging and dogging, working safely at heights, assembling and erecting transmission structures, installing overhead transmission conductors, and operating a 4WD. Participants will start with the basics and work their way over time and under supervision to construct transmission lines.

5. Where will I be located?

The participants will complete the first 49 days of the program based at the Lockhart camp, with classroom training held at the Ironbark Training Facility in Wagga Wagga. On day 50 participants will travel to Buronga camp to commence on-the-job placement.

All participants will live in accommodation camps located along the NSW construction corridor. These camps are located near:

- Wentworth (Renmark Road)
- Buronga (Arumpo Road)
- Balranald
- Hay (Cobb Highway)
- Dinawan (between Coleambally and Jerilderie, Kidman Way)
- Lockhart (County Boundary Road)

6. Will I be on a roster?

All participants selected for the program will be working 10 hours per day on a 21/7 roster. You will be onsite for 21 days and returning home for seven days of rest and relaxation.

7. How much will I be paid?

Participants will be paid above award wages with the salary equivalent to a rigger and a dogger including site allowances. This is not an apprenticeship or a traineeship.

8. When would I start?

There will be 12 intakes over a 12 month period, with each intake consisting of eight participants. Your actual starting date will depend upon what intake you are allocated.

9. What happens when the training is complete?

Once the training is completed and you are qualified, you will be given the opportunity to work on Project EnergyConnect, Australia's largest transmission line project.
