

EnergyConnect

Community Update

September 2024

Elecnor Australia has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply.

Guyed towers between SA border and Buronga, NSW.

Transmission line activities

As part of the nation-building EnergyConnect project, we have completed the construction of the 135km line from Buronga to South Australia and commencing network testing and pre-commissioning in the September quarter of 2024. This means the new line will be carrying live electricity in the coming weeks.

This follows the successful connection of the 220kV and 330kV high voltage equipment within the Buronga substation switchyard and testing of the new lines to South Australia and Victoria.

EnergyConnect will enable the sharing of energy between NSW, VIC and SA.

More information

For more information about what activities can be carried out on the easement and in proximity to live powerlines, please visit: [Transgrid Easement Guidelines](#) or scan the QR Code below.

If you are uncertain or require further information regarding works around or in Transgrid easements, please contact: **1800 222 537** or email: easements&development@transgrid.com.au
