

EnergyConnect

Community Update

September 2024

Elecnor Australia has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply.

High voltage work on Line 4 between the Buronga substation, NSW and Red Cliffs substation, VIC.

Live transmission line activities

As part of the nation building EnergyConnect project, we have commenced live transmission line activities between Buronga substation, NSW and Red Cliffs substation, VIC. This is known as Line 4. There are several steps that need to be completed before the line is fully operational and the old line is removed. For your safety, please treat this transmission line as live.

The project team is currently undertaking inspections and testing of the completed infrastructure before conductors on both sides of the towers become fully operational. This is expected to occur by the end of September 2024.

EnergyConnect will enable the sharing of energy between NSW, VIC and SA.

More information

For more information about what activities can be carried out on the easement and in proximity to live powerlines, please visit: [Transgrid Easement Guidelines](#) or scan the QR Code below.

If you are uncertain or require further information regarding works around or in Transgrid easements, please contact:
