## Out of Hours Construction Notification

March 2024

**Elecnor Australia (formerly SecureEnergy) has been contracted by Transgrid to deliver part of EnergyConnect with the construction of 700km of new power lines from the SA border to the regional energy hub of Wagga Wagga. The project will connect the electrical grids of New South Wales, South Australia, and Victoria, improving reliability of our nation's energy supply.**

### Work outside approved construction hours

As part of the EnergyConnect project, the approved hours of construction works are:

- 7am to 6pm Monday to Friday
- 8am to 1pm Saturdays
- At no time on Sundays and NSW Public Holidays

From **Thursday 4 April to Thursday 11 April 2024**, Elecnor Australia will be carrying out work to upgrade the Wagga Wagga Substation and the new transmission line being built. During this period, work is scheduled to occur between 6am and 8pm and includes the replacement and upgrade of high voltage equipment. Our team will also be drilling foundations for eight monopoles located near Boiling Down Road. This infrastructure will eventually assist in bringing the EnergyConnect feeder into the substation.

Workers will need to access the substation early in the morning and in the evening for onsite briefings and end of day procedures, which will mean a small increase in the number of light vehicles in the area outside of approved construction hours.

### How will this impact me?

There is no impact to noise levels and we are sending this notification as a courtesy.

### Equipment

The kinds of equipment you can expect to see include knuckle booms, a straight boom, mobile cranes, drilling rig, concrete trucks, light vehicles and a welder.

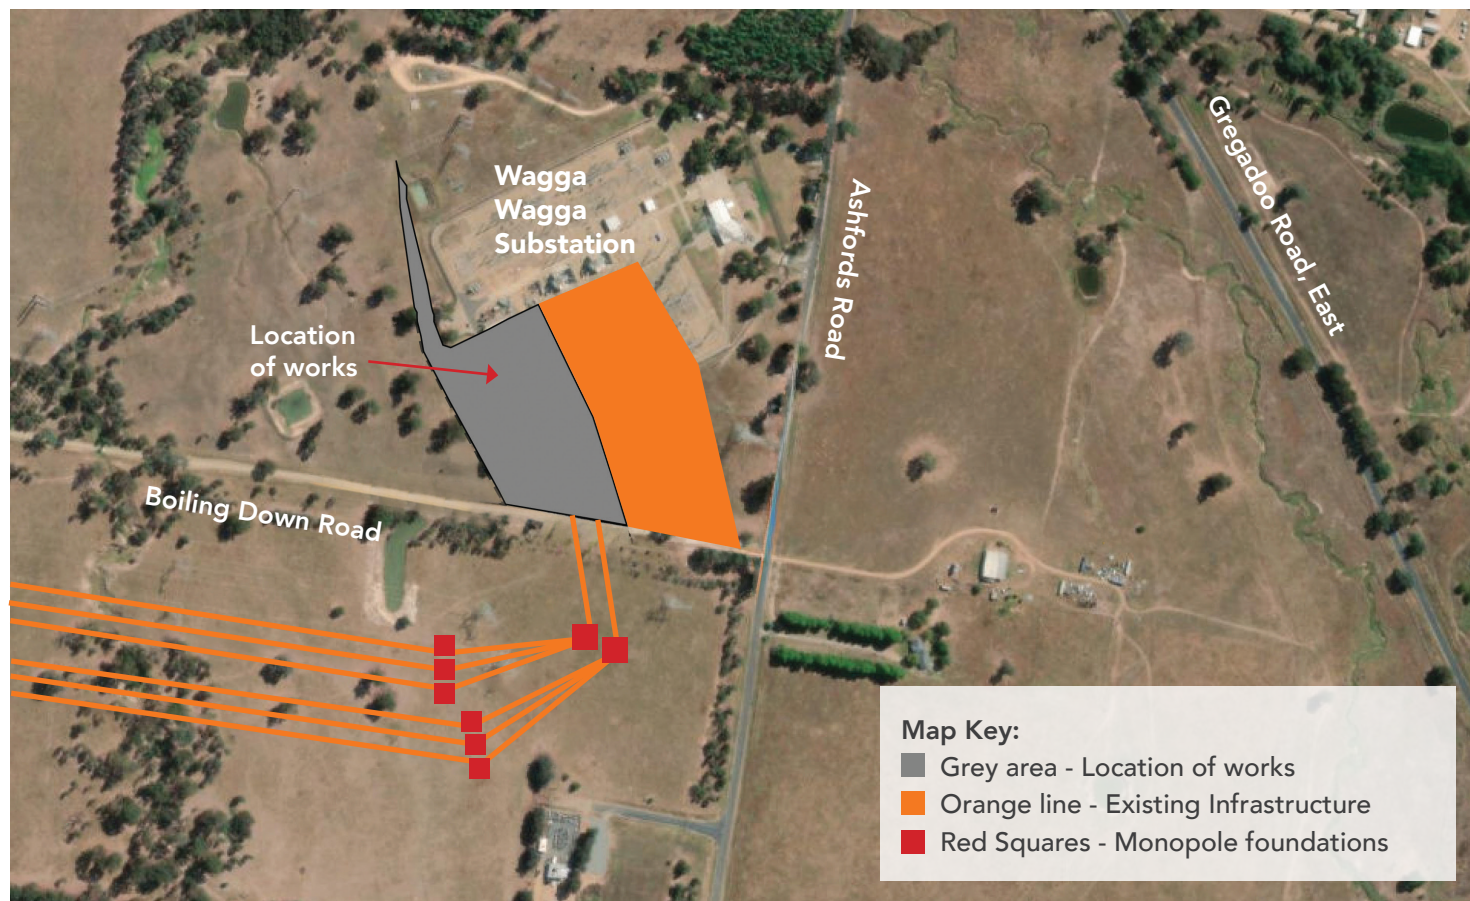

### Dust

Our work is likely to generate some dust. To reduce the impact for nearby residents and motorists, we'll be providing continuous dust suppression, where practical, during our construction activities in line with our environmental approvals.

### Traffic

There will be an increase of light vehicles to facilitate onsite pre-starts and end-of-day procedures prior to and after the standard construction hours.

## Where we will be working

### Fact Sheets
